MEMORANDUM

TO: Gad Tawadrous, EPA

FROM: J.N. DiBenedetto, TAT PM *GD 8/29/94*

SUBJECT: Sampling Trip Report, Paul's Tank Cleaning, Industrial Drive, Hainesport Township, Burlington County, NJ

TDD#: 02-9404-0018

DATE: August 24, 1994

As requested by the EPA OSC, one sludge sample was collected from the 21 foot vertical tank previously sampled by NJDEP circa 1983. The sampling team accessed the sample material by removing a three foot diameter, 1/2" steel plate manhole cover from the tank's north side at grade. There were four 3/4" bolts securing the cover to the manhole which were removed along with a three foot diameter gasket. Direct observation into the tank revealed the tank was empty as expected. Sample was collected by scraping the tank floor with a bent metal pipe to scrape a sufficient volume (8 oz) of sludge to be analyzed for PCB content.

The sample was hand delivered to IEA Laboratory, in Whippany, NJ, August 25, 1994.

A copy of the Chain of Custody is included with this report. The sample was sent to the laboratory without duplicates or blanks.
